

Description

It is suitable for all kinds of electronic industry, which mainly solves the bad situation of products produced by manual breaking off.

Features

1. **Equipment versatility:** The Automatic PCB Separator is designed to cater to the cutting requirements of both PCBA products and LED products, offering a wide range of applications and adaptability to various production needs.
2. **Multi-functional feeding:** This machine is equipped with the capability to perform both online separation and manual feeding, providing flexibility in the production process and accommodating different operational preferences.
3. **High efficiency operation:** The Automatic PCB Separator excels in high-efficiency operations, ensuring swift and precise separations with minimal downtime, thereby enhancing overall productivity and output.
4. **Simple changeover and rewiring:** With a modular design for blade modules, the machine facilitates easy and quick switching between different configurations. The entire blade module can be replaced at once, simplifying changeovers and minimizing setup time.
