

Pin Insertion Machine ET6000 combined with performance enhancing accessories provide the flexibility to meet a wide range of customer requirements in the manufacturing of printed circuit boards. The machine can insert a comprehensive range of pin components with different shape and dimensions. The exclusive feeding system can accommodate reel-joint packed pins and loose pins. The servo-driven insertion head offers a precise and fast pin component insertion. Clinching system is adjustable to meet different process requirement. Our pin insertion machine has been proved to deliver the maximum performance and highest quality within their range of applications.

- ◆ Can insert a comprehensive range of pin components with different shape and dimensions.
- ◆ Can accommodate reel-joint packed pins and loose pins.
- ◆ The servo-driven insertion head.
- ◆ Adjustable clinching system meets different process requirement.
- ◆ Insertion rates up to 2 per second at 0.2 in (5.08 mm) pitch.
- ◆ Low stress application.
- ◆ SMEMA compatible.
- ◆ MES compatible.
