

Description

Discover the innovative ETE-BL06 Component Feeder, a cutting-edge ESD belt feeding solution designed to seamlessly integrate into existing SMT lines. This automated feeder is ideal for component insertion, offering precise and gentle handling without the need for vibration. Explore its flexible and adaptable design for various pick-and-place machines.

Specification

Product Detail Description: ETE-BL06 is a flexible and innovative ESD belt feeder designed to provide gentle and adaptable component handling for SMT lines. This feeder offers seamless integration into existing production lines, making it an ideal solution for automated component insertion. Its noise reduction capabilities create a quieter working environment, while its ability to handle loose materials without additional packaging makes it a cost-effective solution. Additionally, ETE-BL06 allows for quick line changes and adjustable feeding speeds, enhancing production efficiency and adaptability to different pick-and-place machine models. With its flexibility and gentle handling, ETE-BL06 is a versatile component feeding solution for various manufacturing needs.
