

Description

Bend lead and cutting lead of axial elements such as resistance and dipole.

Equipment introduction

1. Small volume and light weight, lock and buckle on the work surface;
2. Artificial hand-shaking operation;
3. Gear drives the continuous feeding of tape-cutting components;
4. Cut feet, bending feet, return material continuously completed;
5. The span and lead length size are adjustable.

Equipment configuration and parameters

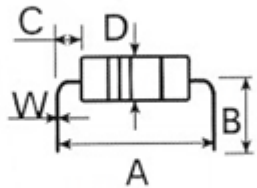

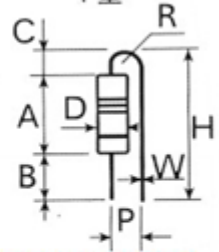

Tool / mold material: SKD11, Japan

Sheet metal process: high temperature powder spraying / surface anode / hard chromium

Overall dimensions: L430 * W300 * H280mm

Weight: 13KG

Processing efficiency: 30,000-60,000 p c s / H

	YT-100U	YT-100F	U mould	F mould
