

Description

Discover the secret to smooth SMT soldering - our Solder Recovery System. This automated warm-up machine eliminates variables and defects from inconsistent manual restoration. Built-in timers sequence multiple pastes simultaneously, while regulated heat gently brings each to optimal viscosity and activation. Operators love the simplicity and peace of mind. See how our recovery system can be a game changer for your production floor!

Features

- Precise temperature control gently ramps paste to ideal viscosity
- Built-in timers automate sequencing of multiple pastes
- Compact footprint fits anywhere on SMT production floor
- Intuitive interface simplifies operator training and use
- Data tracking for paste management and quality control
- Designed for high mix assembly with rapid changeover
