

Description

The TR-400 is a highly efficient THT electronic component processing equipment designed for precise pin shaping and foot cutting of transistors and ICs. Featuring a 20-tube automatic feeding system and advanced mechanical drive, this machine offers convenience, speed, and accurate positioning. Explore the specifications and usage of the TR-400 for your electronic component manufacturing needs.

Features

- 20-tube automatic feeding system with direct vibration feed and discharge
- Full mechanical drive with motor structure
- Circular disk design with precise cam divider positioning
- Convenient and quick operation
- Small-sized PLC control system
- Intelligent control of photoelectric sensing and vibration plate feed
- Adjustable forming height and foot cutting length
- Knob with reference scale for easy adjustment
